Services. Worldwide.

The SIP Medical Family Office®

## The SIP Medical Family Office

The "Family Office" has been a symbol for 100% dedication to a person's or a family's finances.

With our Medical Family Office service offering, we apply this concept to your real wealth: Your Health.

Since the first Family Office, “House of Morgan”, was founded in 1838 for the Morgan family – founders of the JPMorgan dynasty in America – the term “Family Office” has been synonymous for total dedication to the prosperity of wealthy individuals or families.

With the SIP Medical Family Office, we have applied this concept to what is your real wealth: Your Health.

Swiss Insurance Partners has pioneered the Medical Family Office concept, based on the original introduction of this concept many years ago by Dr Francis Meier in Geneva, who is a member of the distinguished panel of doctors on Swiss Insurance Partners’ Medical Advisory Board.

With a complete range of discrete services around your wellbeing, from International Health Insurance, to Privileged Healthcare access and Preventive Medicine, and Medical Records Management we make sure that your health is protected – our mission for over 20 years.

## International Health Insurance

In today's international environment, adequate health cover is important but often overlooked by clients and their advisors alike.

International health insurance will guarantee worldwide cover in combination with free choice of doctors and hospitals, availability of comprehensive best-in-class health insurance services across borders, and global flexibility. No matter where you relocate to in the future, you will be able to seamlessly continue your health insurance with a renewal guarantee for lifetime.

Swiss Insurance Partners will be advising you on finding the right insurance plan among dozens of options, and serve as your single point of contact for anything related to your insurance for as long as you keep it. We will take all administrative efforts off your shoulders, make sure you are reimbursed for any cost in a timely manner, ensure that insurance companies do not overprice your premiums, and much more – at no additional cost.

Depending on individual circumstances and requirements  
between CHF 5'000 and CHF 50'000 p.a.

## Independent medical support with expert guidance

The information asymmetry in healthcare is a significant issue, as patients have no other choice than trusting medical doctors' advice.

Since clinics and hospitals have financial targets, in many cases this leads to unnecessary surgeries, MRI scans or drug prescriptions.

An unbiased, independent medical expert who has no financial incentive in your treatment should accompany and support you during your medical journey. This may include being present at medical appointments as an immediate second opinion, or reviewing diagnosis and prescriptions and providing second opinions on recommended treatments.

This service is available exclusively  
to our Privileged Healthcare Members.

## Privileged Healthcare Membership

Annual Healthcare Membership levels:

Consultation on hourly basis for non-Members: CHF 250 / h

SIP Gold Plan: CHF 3'000 p.a.

CHF 24'000 p.a.

## Preventive Medicine: The SIP check-up programs

Many of even the most serious illnesses can be cured or even prevented when detected early enough to start immediate and appropriate treatment.

Our exclusive check-ups offer a new and better way to manage your health. Based on latest scientific research, we developed an innovative approach together with leading health professionals to create a proactive health management system.

Insights on biological and genetic conditions allow for fully personalized consultations about how to manage health risks on a tailor-made basis. This may lead to a significant risk reduction – and early-stage detection – of conditions such as diabetes, heart disease, cancer and many other common but often preventable diseases.

Costs depending on the requirements –  
charged directly by the treating doctor

**Your health records always at hand  
in cases of emergency or treatment abroad**

Over time, you accumulate a vast number of documents related to your health and medical situation. Since these documents are, in most cases, spread over many locations - sometimes around the globe - it is difficult to allow for fast access in cases of emergency or treatment at new locations.

Swiss Insurance Partners centrally stores, organizes and manages all your medical files, protected by very high security and data protection standards in Switzerland. This can also include translating records in different languages if required and requesting incomplete records. Wherever and whenever you require access to your medical history, you can rest assured that your records are available in the shortest possible time, potentially saving your life by avoiding mistreatment, or by losing critical time while waiting for records to arrive for review.

Medical Records Management: CHF 2'500 p.a.

Medical History Review and Summary: CHF 5'000 base fee

## The SIP Patient Guardianship™

When it comes to appointing a person to make decisions about our health in case we are no longer capable to express our will, most people choose a close relative. In most cases, this person has no medical knowledge to make a profound and competent decision based on the doctor's recommendation, and in addition, is under a lot of emotional stress.

In such critical situations, Swiss Insurance Partners will coordinate that your decision making process is supported by one of our trusted and independent medical experts, specialized on the relevant field. This specialist will not have a financial interest which a treating facility may have when it comes to recommending further treatments. With that, his recommendations can fully, and only, focus on the patient's well-being. Further to that, the independent medical expert can help to decide and suggest on available alternative treatment options, and supervises interventions to avoid medical errors.

CHF 500 p.a.
